

Johns Hopkins Engineering

Applied Machine Learning for Mechanical Engineers

Machine Learning Fundamentals, Part 2, E

JOHNS HOPKINS
WHITING SCHOOL
of ENGINEERING

Shallow and Deep Neural Networks

- By the end of this lecture you will be able to:
 - Create your first shallow neural network and train it on a classification problem
 - Create your first deep neural network and train it on a classification problem

Shallow and Deep Neural Networks

Let's jump to Module04_C.ipynb

Shallow and Deep Neural Networks

- In this lecture, you learned about:
 - How to create a shallow neural network and train it on a classification problem
 - How to create a deep neural network and train it on a classification problem
- In the next lecture, we will go over some popular supervised machine learning techniques.
